Please reject the National Association of Broadcaster's petition 04-160. I feel strongly that the public's airwaves should be regulated to assure that we all have access. Equally important however, is that when the FCC has granted use to a group, such as XM Radio and their competitors, that those users, and in this case customers like myself who have paid for the service, should be able to receive any content that we feel is appropriate, such as local weather and traffic. Please protect the rights of the public by rejecting the NAB's petition.
Sincerely,

Bruce Cornett
